

The wide use of chemicals in many settings such as manufacturing, facilities management, and construction poses environmental health and safety challenges requiring special expertise. Several OSHA, EPA, and DOT regulations require the evaluation of risks associated with chemicals and specify controls during use, storage, and transportation.

It is challenging for companies to fulfill their obligation to communicate hazards to employees, customers, and the community because the knowledge of health effects associated with chemical exposures is continuously evolving.

## Colden's Services

- Regulatory compliance exposure monitoring
- Evaluation of physical hazards such as fire and explosion risks
- Preparation of Safety Data Sheets
- Process safety management
- Hazard communication program management
- Management of laboratory chemical hygiene plan
- Assistance with product stewardship programs
- Community right-to-know and EPCRA reporting
- Management of particularly hazardous chemicals
