

Colden's Certified Industrial Hygienists, Certified Safety Professionals, and doctorate-level health science professionals have experience with and a practical understanding of the scientific, technical, and regulatory complexities inherent in environmental, occupational health, and safety litigation.

Our team of professionals regularly provides case development and testimony services for litigation involving mass and toxic torts, disease clusters, product liability, and workers compensation cases. Colden's experts provide retrospective personal exposure assessments, historical regulatory compliance determinations, dose reconstruction, and exposure measurements and evaluations.
