

OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT SYSTEMS

An occupational health and safety management system (OHSMS) facilitates organizational effectiveness to foster health and safety improvements. Applying an approach introduced by quality control pioneer Dr. W. Edwards Deming, our OHSMSs employ the Plan-Do-Check-Act (PDCA) model to improve corporate health and safety outcomes.

Colden's tailored OHSMS yields improvements in corporate communication, morale, quality, and injury and illness rates. By leveraging the best of in-place systems, we tap into the client's unique health and safety culture to elicit robust — and sustainable — employee participation.
