

# Freeze Frame: Focus on Health & Safety

Join Colden's team of highly experienced, and field-tested senior consultants for a unique training experience. This fun, collaborative, and interactive session will have a lasting impact on the way you view health and safety compliance, and health and safety as a whole!

## What's Involved

In this seminar, Colden's senior consultants use hundreds of photographs of actual health and safety (H&S) regulatory compliance issues to take participants on a virtual tour of one of the worst work environments you can imagine.

The overall goal of this presentation is to educate participants about hazard and risk identification and discuss examples of both common and uncommon compliance audit and assessment scenarios. Colden's instructor-facilitated seminar is team-based, energetic, and highly interactive.

## How will this benefit me and my company?

- Improve workplace H&S hazard, risk, and compliance issue recognition skills
- Learn how to apply OSHA standards, compliance directives and letters of interpretation
- Gain a deeper understanding of regulatory compliance practices
- Obtain more knowledge about relevant standards, guidelines, and directives
- Actively work with other environmental, health and safety (EHS) professionals in a team based learning environment
- Share experiences, problems, and case studies
- Obtain credit for your professional certifications (e.g., CIH, CSP, CHMM, etc.)
