

HEAT STRESS MANAGEMENT

Colden Corporation specializes in heat stress management, offering comprehensive services to help you evaluate and control heat-related hazards in your work environments. Our Certified Industrial Hygienists (CIHs), Certified Safety Professionals (CSPs), and support staff partner with you to define your needs, create tailored solutions, and ensure that you understand the prescribed course of action. To ensure worker safety and compliance with existing and new state heat stress regulations, Colden Professionals can help you with the following services:

Colden Services:

- Reviews of applicable heat stress regulations
- Exposure assessments and monitoring
- Heat index and wet bulb globe temperature (WBGT) mapping
- Program development and training
- Program evaluation and auditing
- Engineering control selection for process heat mitigation
- Personal protective equipment assessments
- Analysis and guidance on work and rest cycles
- Emergency planning and response
