- Provided guidance on appropriate personal protective equipment (PPE) and emergency response for qualified employees including such items as; ballistic vests, respirators, fall harnesses, first aid kits, survival go-bags, respirators, and safety glasses.

Professional Certifications/Associations

- OSHA Construction Safety and Health 30-hour Training Certification
- Certified in Red Cross First Aid and CPR
- Certified in Hostile Environment and Emergency Field First Aid
- Member, American Society of Safety Engineers
- Member, American Industrial Hygiene Association

Professional Highlights

COLDEN CORPORATION

Working out of Colden's New York City office, Ms. Chaban provides industrial hygiene, safety assessments and training, indoor air quality, and asbestos management.

Emergency Indoor Air Quality Support - Provided comprehensive indoor environmental quality oversight for a Major Broadcast and Media Center in New York City following a fire in a production studio. Included oversight of building recovery and cleaning efforts with extensive environmental air quality testing to assure adequate health conditions.

CYGNET SAFETY

As a contractor for Cygnet Safety, Ms. Chaban provided on-site support to a major broadcast and media center in New York City. Starting out as an intern, she worked her way up to a Health and Safety Technician, and then a Health and Safety Specialist. Responsibilities included conducting indoor air quality sampling for silica dust, lead, and metal fumes during generator replacement projects. She worked with on-site employees to record and update training on fall protection, fork and scissor lift, hostile environments, and civil unrest safety. She performed ergonomic assessments, respirator fit testing and ensured safety measurements were met at concerts in Central Park. Conducted lighting surveys as responses to employee discomfort, and provided recommendations. Maintained safety supplies and chemical inventory, including updates to Safety Data Sheets (SDSs). Prepared the broadcast and media center's employees for Ebola coverage with personal protective equipment (PPE).

ST. JOHN'S UNIVERSITY

Served as a student research assist to Dr. Rajam's Lab at St. John's University. Assisted in studies focusing on energy efficiency and sustainability. Managed daily set-up, adjustment, and cleaning of laboratory equipment while managing lab stock and supplies.

Education

- St. John's University
Bachelor of Science, Physics with a Minor in Chemistry (2015)
