Professional Highlights

COLDEN CORPORATION

Health and Safety Audits (Construction) – conducts weekly inspections during construction activities in a ~32,000ft² space for an international retailer. Ensures applicable OSHA and other requirements in the site health and safety plan are followed. Remedies findings with site

superintendent immediately to eliminate/reduce risk and completes reporting using the corporate software tool.

Site Safety Officer (Construction) - served as a site safety officer for a construction project at a cement plant in upstate NY. Conducted and documented daily safety tailgate briefings, conducted field safety audits, observed contractor work practices, and maintained daily safety related site records. Performed work zone hazard assessments and reviewed hot work permitting and permit-required confined space (PRCS) entry including atmospheric testing.

Site Safety Officer (Construction) – served as site safety officer for excavation and building projects for an upstate NY utilities company. Conducted and documented daily safety tailgate briefings, conducted field safety audits, observed contractor work practices, and maintained daily safety related site records. Performed work zone hazard assessments and reviewed PRCS entry and critical lifts.

Site Safety Officer (Construction) - served as a site safety officer for an upstate NY paper mill that was replacing and improving a paper machine and ancillary equipment. Conducted and documented daily safety briefings, conducted field safety audits, observed contractor work practices and maintained daily safety records related to the project.

Site Safety Officer (Construction) - served as a site safety officer in Rensselaer, NY for MGP and landfill environmental remediation clean-up and capping projects. Conducted and documented daily safety tailgate briefings, conducted field safety audits, observed contractor work practices and maintained daily safety related site records. Also conducted active work zone atmospheric monitoring and completed required recordkeeping/communications.

Semiconductor Tool/Utility and Construction Safety – implemented safety checklists for micro-chip tool installation and facility utility hookups during construction at a semiconductor manufacturing facility, performed construction safety assessments of contractor work practices, and provided other technical support to site EHS.

Impacted Soil Remediation Projects - worked on impacted soil remediation projects in Athol, Massachusetts as well as New York State including Ogdensburg, Utica, Herkimer and Schenectady. Performed community air and work zone monitoring, provided onsite technical support, and compiled weekly written reports for safety meetings. Also implemented a safety and community air monitoring program at an environmental remediation clean-up site in Rensselaer, NY. Performed fence line air monitoring, provided site safety oversight of the contractor, and communicated directly with client and regulatory agency officials.

Education

- Keene State College, New Hampshire
Bachelor of Science, Safety Studies (2009)
