

RESPIRATORY PROTECTION PROGRAM MANAGEMENT

In 2015, OSHA's Respiratory Protection Standard was the fourth most frequently cited standard following inspections of worksites by federal OSHA. Colden professionals assist our clients in developing, implementing and managing their Respiratory Protection Program in compliance with the requirements of OSHA's Respiratory Protection Standard (29 CFR 1910.134). Colden is able to provide assistance with all program requirements of the standard including:

Colden's Services

- Identifying chemical and biological hazards in the work place that may require the use of respirators for employee protection
- Conducting industrial hygiene sampling to determine if employee exposures to chemical and biological hazards are well controlled or if respirators are needed to protect employees
- Developing and implementing written respiratory protection programs
- Assistance in the selection of appropriate respiratory protection based on monitoring data
- Inspecting, cleaning and repairing respirators on site
- Online medical evaluations
- Employee training in the proper use, care and limitations of respirators
- Initial and annual qualitative and quantitative fit testing

Colden professionals can effectively and efficiently manage all aspects of a client's Respiratory Protection Program, or individual program elements as needed, to help ensure the safety and health of your employees and compliance with OSHA requirements.
