

An environmental health and safety (EHS) management system provides a framework that allows an organization to systematically identify and evaluate its EHS risks and requirements, reduce the potential for incidents and non-compliance, and review and improve its performance as an integrated business function. Colden works with clients to develop, implement, and evaluate EHS management systems based on specifications such as ISO 45001, ISO 14001, ANSI Z10, and the OSHA Voluntary Protection Program, or customized strategies employing the Plan-Do-Check-Act model.

## Colden's Services

- Conduct gap assessments of EHS management systems
- Provide coaching and advice on EHS management system design, development, and implementation strategies
- Develop EHS management system procedures
- Review and update EHS compliance program documentation and management tools
- Facilitate working sessions to:
  - Define or update the EHS policy, goals, and organizational roles and responsibilities
  - Evaluate occupational health and safety risks and environmental aspects and impacts
  - Review EHS emergency scenarios and plan for contingencies
  - Engage employees in EHS planning and program improvement efforts
- Provide training to managers and employees on the EHS management system
- Provide input and support for EHS management review and improvement processes through audits and program assessments, trends analysis, and risk communication efforts for corrective and preventive actions
